

How to Guide for **Preparing Your Poster**

- Please use the standard IEEM [poster template](#). Poster size is 1189mm length x 841 mm height in landscape format, up to 7022 x 4967 pixels (100MB) maximum.
- Place your Paper ID, Paper Title and Authors' names prominently at the top of the poster to allow viewers to identify your abstract easily. **Presenter's name must be underlined and in bold letterings.**
- Author's names, e-mails and address information must be provided in case the viewer is interested in contacting you for more information.
- You have complete freedom in displaying your information in figures, tables, text, photographs, etc. in the poster.
- A successful poster presentation depends on how well you convey information to an interested (but not expert) audience. You may wish to structure your poster by including the background of your research followed by results and conclusions.
- A poster that is overcrowded is unattractive and difficult to read. When showing results, present only those information that illustrate the main findings of the project.
- A Picture Paints a Thousand Words: Use graphs (instead of tables) to present numerical data.
